PUBLIC WORKS DEPARTMENT

To

The Hon'ble Sri M.Bhaktavatsalam B.A.,B.L.,
Minister for Public Works,
Government of Madras,
Fort St.George, MADRAS.

Sir,

Sub: Supply of Electricity to South Kanara.

***

We beg to invite your attention to G.O.Ms.No.3270 dated the 1st September, 1950, wherein the Government's intention to supply electricity to this district from Jog was made known.

When Sri G.Sundaram, Chief Engineer for Electricity visited this Chamber on 23-12-1950, he informed us that no order had yet been placed by the Government for the requisit materials. We take this to imply that the actual constructional work on the pylons and high tension wires from the borders of Mysore State to Coondapur and Mangalore is bound to involve considerable time.

Sir, your stewardship of the Public Works Ministry has been marked by rapid progress in the electrification of all parts of the State. You have shown by your deeds that you believe that the economic regeneration of our villages depends upon the availability of cheap electric energy for the home and for the field. Because you hold such a faith you laboured unceasingly to arrange an agreement with the Government of Mysore for the supply of surplus power from Jog to our district which lies too far away from the centres of generation in our own State to benefit from the electric energy produced there. We would most earnestly request you therefore, to help us get the promised electricity from Jog as early as possible. We are inclined to believe that the

electrical department of the State Government is likely to have a reasonable stock of materials for the State-wide electrification scheme, and it would not be difficult by a little adjustment to spare some materials for the Jog Scheme so that an immediate start can be made with your plans for assisting the ryots and cottagers of this district. The transferred materials can be made good when the stocks yet to be ordered for our district arrive. We look to you to pass the necessary orders so that the work can be commenced. We request you to do so, thereby avoiding the time-lag of two years and bringing so much nearer the realisation of our dreams and hopes.

Thanking you for your constant attention to our problems and trusting to your good-will,

Yours faithfully,
Devidas Girdharlal

Welcome address dated 5.10.1950 presented to H.E. the Governor by the South Kanara Dt.Board.

9
18 JAN 1951
PUBLIC WORKS DEPARTMENT

Please see the welcome address presented to H.E. the Governor of Madras by the South Kanara District Board on page 11/15 c.f. This Dept. is concerned with a portion of para 3 on page 3 cf. As the request to the Post War Road Dev. Scheme is not specific no action is called for now. Considering the poor financial position of the Dt.Board full grants has been given for P.W.R.D.works on the current year, the Dt.Bd. is also likely to get some benefit when the immediate plans for the Development of Madras area is implemented.

This may be sent to P.W.D., Health and F.&.A., Dept. for necessary action with reference to their subjects in the welcome address.

P.W.(B)

A.S.

Please see the note of L.A. Deptt. above and the welcome address on page 3 cf. Copies of page 3 cf. may be given to A, J and S sections for necessary action and the file passed on to Health Deptt.(A copy of L.A. note above may also be given to A J & S Sections).

Government of Madras.
Public Works Department.

Copy of Welcome address to His Excellency the Commodore Maharaja Rao Sri Krishna Kumarasinhji Bhavsinhji, K.C.S.I., Maharaja of Bhavangar Governor of Madras, Fort St. George, Madras by the President, Vice-President and the Members of the South Kanara District Board, Mangalore on 5th Oct. 1950.

We the President, the Vice-President and the Members of the South Kanara District Board extend on behalf of ourselves and of the people of this District a very cordial and hearty welcome to Your Excellency and Her Highness the Maharani, on this memorable occasion of your first visit to this extreme corner of the Province-the reclaimed land of Parashurama the homeland of the great Sri Madhavacharya, the seat of a dismembered branch of the Vijayanagar Kingdom, and the abode of Bhootalapandya, the founder of the Aliyasanthan or the Marumakattayam law of inheritance. Here is nature in her best attire during this part of the year following a rainfall of over 120 inches, with the country-side smiling with luxuriant vegetation, raving rice fields, hills and dales donned with wild flowers, slopes of hills and hillocks carpeted with verdure, numerous streams and rivers bordered on both their sides by the golden headsof corn all enclosed between the Western Ghats and the Arabian Sea. A casual visitor to this district at this part of the year gets an impression that this is a land of wealth and plenty and that all is well with the people who look cheerful. But in reality it is not so. The very nature which has made the district beautiful is the real obstacle for its rapid and proper development of communication and irrigation systems. While the unfordable and the unbridged streams and rivers badly cut the existing roads, the villages which are not connected by any roads at all are isolated by these water ways for the most part of the year.

The rains which pour in torrents from June to September are not conserved in the absence of anyirrigation system. What is more, the very torrents are the main cause of errosion and washing away of surface fertility leaving considerable portion of the land barren. The very luxuriant forest growth which shws the abundance of nature's gift is also responsible for the eastern part of the district being the hot-bed of malaria. Due to the impossibility of proper medical aid reaching the sub-ghat area, Malaria lingers and takes a heavy toll of lives in the Malnad area. The climate which looks so salubrious is humid and quixotic nourishing tuberculosis and year after year the incidence of this dread disease is on the increase. The industrial potentialities of the district could not be tapped for want of electric energy.

2. We do not wish to mar the happiness of this occasion by a wail of our woes for many are our wants and needs. Nor do we embarrass Your Excellency by making any specific requests. And yet Your Excellency being the head of our State, we cannot resist the urge in us to give your Excellency this picture of our district so that your Excellency may not carry on impression that we are a self-contented people living in the midst of nature's bounties.

3. We will be failing in our duty if we do not express our gratitude to Your Excellency's Government for sanctioning grants in recent years for the improvement of road communications under the Post War Road Development Scheme the sanctioning of a few bridge Schemes, the launching of the anti-malarial operations in Puttur Taluk, the sanctioning of a T.B.Hospital and Sanatorium close to Mangalore and for completing the agreement between this State and Mysore Government to supply electric energy from the Jog Falls. And yet much remains to be done and it is our hope that we, living as we are, at the farthest end of the State beyond the Western Ghats on this side of the Coast, our voice feeble as it is, would be heard and this district given its legitimate share to work our schemes for a net-work of roads opening out villages to short irrigation systems for the bringing under cultivation more

original in W995 5/57

Copy of letter No.G1/A.2/P.52/173 I/50-33 dated 29th December 1950 from the Chief Engineer for Electricity, Madras addressed to the Secretary to Government, Public Works Department, Madras.

Sub:- Electricity - Extension of supply to South Kanara - Expediting construction - Availability of materials.

Ref: Govt.Memo.No.5482-3/50-1 dated 9-12-1950 and No.4995 3/50-3 dated 24-12-1950.

With reference to the above, I have to state that at present a large number of projects and schemes are in various stages of construction in the Department and collection of all the required particulars in the manner required by Government will take some time and will be submitted if required later on. In view of the urgency, I have taken into consideration in this note the particulars in respect of only such schemes as are technically similar to the proposed South Kanara Extensions.

2. It was originally proposed that power at 66 K.V. would be extended from Jog to Mangalore. But theChief Electrical Engineer, Mysore Government has since expressed the view that their Government would supply power at 110 K.V. in view of the difficulty and delays that would result in establishing step down arrangements for 66 K.V. supply. From the point of view of larger and satisfactory load expansion in the South Kanara District, the higher voltage of supply would be advantageous from our point of view as well. We are therefore considering taking supply at 110 K.V. from Mysore Government and extending it right up to Mangalore.

3. The number of 110 K.V. lines now under construction in the [illegible], between Erode and Trichinopoly. Except for the aluminium conductors which are expected to be delivered next month, all the other materials are already at site.

4. Except for these there are no other 110 K.V. line materials or equipment available in stock for diversion to South Kanara anywhere in the Department.

5. Sanction has been accorded for the immediate construction of the 110 K.V. lines from Mykara to Coimbatore and Coimbatore to Nathurai. Tenders for the materials are due next month and orders

... to be placed.

.. It will be seen from the details given below that any ... portion of the materials intended for Erode-Trichinopoly ... Erode-Salem is not possible.

(a) In the Erode-Salem 110 K.V.line all the towers have been erected and insulators are being mounted. As soon as the conductors arrive the line has to be strung and supply to Salem commenced. The transformers 66/22 K.V.(to be operated initially at 66 K.V.) for giving supply at Salem have also arrived. This work is in a very advanced stage of construction.

In view of the unsatisfactory voltage conditions at Salem the inadequate transformer capacity at Metur Power House and Erode substation supplying the Salem area loads sanction for fresh service connections are not being given and large agricultural loads have thus been starved for power for the last 2 years.

If the completion of this line is delayed, there will be a lot of discontent and distress among the rural population in the area.

(b) As regards the Erode-Trichinopoly line the stubs for a portion of the line have already been set and further work is in progress. This is done on contract, and if it is now ordered to be stopped, payment of heavy compensation to the contractors will be involved.

The Erode-Trichinopoly extension is further an immediate need to improve quickly the voltage conditions in Trichinopoly and Tanjore area which are not satisfactory and are slowly ... with the increase in load in this area. Secondly, we are committed to the supply of increased power to the Kalpakkam ... by the end of 1947. ... Kalpakkam will suffer too under bad voltage conditions ... by complaining and unless the

be met fully and satisfactorily. The transformers and switchgear required for Dalmia have already been received at site.

(c) The size of conductors to be used for the South Kanara line is different from the ones ordered for the Erode-Trichinopoly line and orders for the required size have to be placed involving delivery period of not less than one year to 18 months.

7. I would also point out that irrespective of the above, supply to South Kanara would not in any manner speed up as the construction of the portion of the line by Government of Mysore in their territory would take as much time, if not more, as we would take for the construction of the line from the Mysore border to Mangalore.

8. As regards the equipment for the substations, the 110 K.V.power transformers required for the scheme have necessarily to be ordered now as none are available in stock or ordered for other projects and schemes in the Department.

9. In the circumstances, I am afraid that delay in the execution of the South Kanara scheme is unavoidable.

10. However, when orders are placed for the required equipment, due weightage will be given for offers of quickest delivery. The anxiety of the Government to afford supply in the quickest time possible will be fully borne in mind during the various stages of execution of the scheme, and no efforts will be spared to ensure expeditious progress and completion.

11. In the meanwhile with a view to stabilise and extend supply in the Mangalore and Udipi local areas to the best possible extent before Jog power reaches them, this Department has already submitted to Government in letters No.E3./A3/R.2533-1 dated 28-9-1950 and E3/A3/R.2533 I/50-3 dated 30-10-50 schemes for additional diesel sets in the two towns. 2 Nos. sets ordered for Udipi are expected to be delivered by the end of 1951. On receipt of Government sanction, the 500 K.

set required for Mangalore will be ordered and the schemes pushed through, the other line materials and distribution transformers being diverted from the existing departmental stocks. This measure should better the supply conditions in the areas already having electricity and build up further load in preparation for Jog supply.

(Ref. Memo No. 4995 S/50)

Copy of letter No.173-1/50-41 dated 2-2-1951 from the Chief Engineer for Electricity, Madras addressed to the Secretary to Government, Public Works Department, Madras.

Sub: Electricity - extension of supply to Joutalam ra - Expediting construction - Availability of materials.

Ref: Memo No.4995-S/50-5 dated 25-1-1951.

-

Tender specifications for transmission lines and substations are under preparation and are expected to be issued by about the middle of this month, and contracts for supply of materials and erection are likely to be placed by August 1951.

Under the existing delivery conditions the materials may be completely delivered in 24 months from the date of order. i.e.by about the middle of 1953.

The transmission line construction is expected to be commenced by July, 1952 and substation erection about the middle of 1953 when the materials are delivered.

Extract from CE(E)'s letter d 29.1.1951 in file 1195/5/1
Relating to a Z.A. Question on South Kanara Scheme

Allowing for periods of tendering, awarding of contracts, manufacture, delivery and erection of lines, plant and equipment, supply is expected to commence under the Scheme by the second half of 1954

(True copy)

Lr.No.201 S/51-1 d/20 -2-51.

To

The President,
Kanara Chamber of Commerce,
Mangalore.

Sir:

Sub:-Electricity - Jog supply to South Kanara - Expediting construction of the scheme.

Ref:Your representation d/11-1-51 to H.M.(P.W.)

I am directed to state that it was originally proposed that power at 66 KV would be extended from Jog to Mangalore. But the Chief Electrical Engineer, Mysore Govt., has since expressed the view that their Government would supply power at 110 K.V., in view of the difficulty and delays that would result in establishing stepdown arrangements for 66 KV supply. This higher voltage of supply is also advantageous to this Government. The number of 110 KV lines already under construction in Madras State is only two, viz. Erode-Salem, and Erode-Tiruchirapalle lines. The work on the Erode-Salem 110 KV line is in a very advanced stage of construction. The work on Erode-Tiruchirapalli line is also in progress, and further, the size of the conductors ordered for the line is different from those to be used for the South Kanara line, and orders for the required size have to be placed involving delivery period of not less than

one year to 18 months. Any diversion of the materials intended for these 2 lines to South Kanara is thus not possible. Except for these 2 lines, no other 110 KV line materials or equipment are available with the Government Electricity Department for diversion to S~~outh~~ Kanara.

2. Irrespective of these difficulties, it may be difficult to speed up electric supply to ~~S.K.~~ South Kanara, as the construction of the line by Mysore in their territory would take as much time, if not more, as this Government would take for construction of their line from Mysore border to Mangalore. Tender specifications for transmission lines and substations in connection with the S.K.Scheme are to be issued ~~by about the middle of~~ very shortly ~~February 1951~~ and contracts for supply of materials and erection are likely to be placed by August 51, after giving due weightage for offers of quickest delivery.

3. I am to add that the Government share your anxiety to afford supply to ~~S.K.~~ South Kanara in the quickest time possible, and no efforts will be spared to ensure the most expeditious progress and completion.

Y. F.

Sub: Electricity - Jog supply to South Kanara
Expediting construction of scheme —
Representations

Refer: from the Kanara chamber of
Commerce, Mangalore, refer. dt 11/5/
to HM (PW) -

"secy. PW/ I am unable to understand
this impatience. Let me know the position".
(Sd) M. B/d 16.1.1951

Welcome address presented by the S. K.
Dt. Bd. to H. E. the Governor on 5-10-1950.

Please see the refers. cited.
The Kanara chamber of Commerce and
Suk. Dt. Board request for expediting
supply of elec. The chamber of Commerce
suggests that materials can be arranged
for the Kanara scheme by the method
of adjustment and transfer from other
schemes. This question has already been
considered in detail in the file and
also discussed in the Monthly Elec
Confce. on 5.1.1951. It may be pointed
out that the CE has made the position
sufficiently clear that it is not possible
to divert any of the materials from other
schemes now in progress. In the circ
it does not seem necessary to consult the
CE(E) again on the present refers. which
contain no new point. A reply may
perhaps be sent to the S. K. Chamber & Dt. Bd.
that Govt. share their anxiety to afford
supply of electricity to the South Kanara area
in the quickest possible time and that no
efforts are being spared to ensure expedi-
tious progress and completion of the scheme
by trying to minimise delays, which, however, seem

unavoidable. subject to approval a draft letter is put up.
24.1.57 It may be OKd by HM (PW) for approval before issue
W.r.to his minutes extracted at M'overleaf.
BJ
22/1/57

B Copy of CE(E)'s letter dt 29.12.56 in the other file may be added to Cf., and a more detailed draft reply may be put up on the lines of CE(E)'s letter, which was also discussed at the monthly electricity conference on 2-1-57.

N
23.1.57

A2 P1

The Kanara chamber of commerce and the South Kanara Dt. Bd. have asked for the expeditious supply of (hydro) electricity to South Kanara. The chamber of commerce has suggested that materials can be arranged by the method of adjustment and transfer from other schemes. It may be mentioned here that this question has been considered already in detail and also discussed last in the monthly Elecy. confee. on 2.1.1957. The CE(E) has made the position sufficiently clear that diversion of materials from other schemes to South Kanara is not possible - see his letter dt 29.12.1950 (Copy at pp 19-25 cf.) which was discussed in the Monthly confee.

A draft reply letter on the lines of CE(E)'s letter cited is put up. It may be OKd to HM(PW) for approval W.r.to his minutes extracted at M'overleaf.

pp 1-3 Tt-43 cf

The Kanara Chamber of Commerce and the South Kanara Dt. Bd. have requested for expeditious supply of Jog power to South Kanara. The Chamber of Commerce has suggested that materials can be transferred from other schemes, if necessary, so as to be available for the South Kanara Scheme.

2. The question of expediting the construction of the South Kanara Scheme has already been engaging the attention of the Govt. The subject came up for discussion w.r.t. to the materials position, ~~in the Board~~ in the monthly Elecy. Confee. on 2-1-1951. The CE(E) explained the position in detail as on pp 19-25 cf as to how delay in the execution of this scheme is unavoidable. The CE(E)'s views were accepted on 2-1-1951. W.r.t. to this, the Hon. Minister for Agriculture desired to know whether the required materials had been ordered and what time it would take to get them and begin the work. The CE(E) has since replied that contracts for supply of materials and erection are likely to be placed by August, 1951, ~~that under~~ under the existing delivery conditions, the materials may be completely delivered in 24 months i.e. by the middle of 1953 and that the transmission line construction is expected to be commenced by July, 1952 and Sub-station erection about the middle of 1953 when the materials are delivered. He has ~~again~~ earlier stated in another connection that allowing for periods of tendering, awarding of contracts, manufacture, delivery and erection of lines, plant and equipment, supply is expected to commence under the scheme by the second half of 1954. A draft reply on the lines of the above

reports from the CE(E) is submitted. It may be circulated to H.M.(P.W) for approval with reference to his minutes on H.M. on plants.

13/2/51 H.M.(Agri) may also perhaps see for information.

RM 13/2/51

The case relates to the request of Kanara Chamber of Commerce to expedite the construction of the South Kanara Electricity Distribution Scheme, by diverting materials from elsewhere in stock in Madras State.

A draft reply is put up based on CE(E)'s latest reports. It is proposed to inform the Chamber that diversion of materials to South Kanara is not found possible, and that irrespective of our difficulties Mysore may take as much time, if not more, to construct their line to deliver power to S. Kanara, as we may require to construct our own line.

Detailed draft below may be circulated to H.M.(P.W.) for approval, with reference to the minutes on p. 5 ante. H.M.(Agri) may also see.
